

JOINT MEDIA STATEMENT

Singapore, 21 October 2024 | For Immediate Release

Precautionary Measures Taken by Government Agencies

Shell reported that an estimated 30 to 40 metric tonnes of slop, a mixture of oil and water, was leaked from its land-based pipeline into the water yesterday.

- Agencies are working closely with Shell to clean up the leaked oil in the channel between Pulau Bukom and Bukom Kecil. As 21 October at 3 pm (Singapore Time), there are no other oil sightings.
- As a precautionary measure, the Maritime and Port Authority of Singapore has deployed a current buster system off Changi at the entrance to the East Johor Strait to collect oil slick, if sighted, and prevent potential spread beyond our port waters. Another current buster system has also been deployed to the west of Singapore, as a precautionary measure.
- While no oil has been observed at Sentosa, Sisters' Islands Marine Park, Labrador Nature Reserve, East Coast Park and West Coast Park so far, agencies have preemptively deployed oil absorbent booms to protect the three beaches and the biodiversity-sensitive coastlines on Sentosa, the lagoons at Sisters' Islands Marine Park, Berlayer Creek and the Rocky Shore at Labrador Nature Reserve, as well as the mangroves and other key areas at the Marsh Garden at West Coast Park, as well as key areas at East Coast Park. The lock gates of Sentosa Cove have been closed, with oil absorbent booms deployed. Additionally, deflective booms will be progressively

deployed across the key areas of Sentosa, including the three beaches which currently remain open for land-based and waters activities.

5. To date there has been no oil sightings at Kusu, Seringat, St John's, Lazarus island, and Pulau Hantu. Singapore Land Authority will continue to assess if oil-absorbent booms will be required at the lagoons of these islands.

6. As a precautionary measure, the National Environment Agency has advised the public against swimming and conducting other primary contact water activities at the beaches at East Coast Park, Kusu, St John's, and Lazarus island. Information on water quality at these beaches is available at <https://go.gov.sg/beach-water-info>.

7. PUB, Singapore's National Water Agency, is closely monitoring the seawater intake at its desalination plants. No oil has been detected near the Jurong Island Desalination Plant and Marina East Desalination Plant, which are located nearest to the oil leak location. Seawater quality readings remain normal, and the plants' operations are not affected. As a precautionary measure, PUB has also deployed oil containment booms across Marina Barrage.

8. JTC has advised companies on Jurong Island and waterfront-facing companies in the western region to be on alert and to take precautionary measures as necessary.

9. To date, there has been no reports of fish farms being affected by the leak. Nonetheless, Singapore Food Agency is in contact with our farmers and has advised them to continue to be vigilant and to take precautionary measures as necessary.

10. Businesses which have claims-related queries arising from this oil leakage can contact Shell appointed administrator at +65 6632 8689 (during office hours: 9:00am – 5:30pm) or email shell_claims@crawford.asia.

11. We have informed the Indonesian and Malaysian authorities of the incident and advised them to look out for any oil sightings along their respective coastlines.

12. Investigations into the incident are currently ongoing.

About BCA

The Building and Construction Authority (BCA) champions the development and transformation of the built environment sector, in order to improve Singapore's living

environment. BCA oversees areas such as safety, quality, inclusiveness, sustainability and productivity, all of which, together with our stakeholders and partners, help to achieve our mission to transform the Built Environment sector and shape a liveable and smart built environment for Singapore.

For more information, visit <https://www1.bca.gov.sg/>

About JTC

As a government agency under Singapore's Ministry of Trade and Industry, JTC is paving the way forward for Singapore's industrial landscape with sustainable, green and smart estate masterplans such as one-north, Seletar Aerospace Park, Jurong Innovation District, and Punggol Digital District. Our estates attract new investment and foster collaborative ecosystems that strengthen Singapore's position as an advanced manufacturing hub. We also drive innovation in the Built Environment sector by piloting new construction technologies.

For more information on JTC, visit <http://www.jtc.gov.sg>.

About Maritime and Port Authority of Singapore (MPA)

MPA was established on 2 February 1996 with the mission to develop Singapore as a premier global hub port and international maritime centre, and to advance and safeguard Singapore's strategic maritime interests. MPA is the driving force behind Singapore's port and maritime development, taking on the roles of port authority, maritime and port regulator and planner, international maritime centre champion, national maritime representative and a champion of digitalisation and decarbonisation efforts at regional and international fora such as at the International Maritime Organization. MPA partners industry, research community and other agencies to enhance safety, security and environmental protection in our waters, facilitate maritime and port operations and growth, expand the cluster of maritime ancillary services, and develops maritime digitalisation and decarbonisation policies and plans, R&D and manpower development. MPA is responsible for the overall development and growth of the maritime domain and Port of Singapore. In 2023, Singapore's annual vessel arrival tonnage crossed 3 billion Gross Tonnage and remains the world's busiest transshipment hub, with a total container throughput of 39.0 million 20-foot equivalent units (TEUs).

For more information, please visit <https://www.mpa.gov.sg>

About National Environment Agency

The National Environment Agency (NEA) is the leading public organisation responsible for ensuring a clean and sustainable environment for Singapore. Its key roles are to improve and sustain a clean environment, promote sustainability and resource efficiency, maintain high public health standards, provide timely and reliable meteorological information, and encourage a vibrant hawker culture. NEA works closely with its partners and the community to develop and spearhead environmental and public health initiatives and programmes. It is committed to motivating every individual to care for the environment as a way of life, in order to build a liveable and sustainable Singapore for present and future generations.

For more information, visit www.nea.gov.sg

About National Parks Board (NParks)

The National Parks Board (NParks) is responsible for enhancing and managing the urban ecosystems of our City in Nature. We are the lead agency for greenery, biodiversity conservation, and wildlife and animal health, welfare and management. We are also working closely with the community to enhance the quality of our living environment.

NParks manages some 400 parks, 3,347 hectares of nature reserves, the Singapore Botanic Gardens, Pulau Ubin and the Sisters' Islands Marine Park. Adding to this is the extensive network of Nature Ways, and the over 380 km Park Connector Network that links major parks, nature areas and residential estates island-wide. Every year, we run about 3,000 educational and outreach programmes across our various green spaces.

NParks has developed an urban biodiversity conservation model, which aims to conserve representative ecosystems in land-scarce Singapore. NParks also monitors and coordinates measures to enhance the presence of biodiversity in our urban landscape.

NParks is working closely with partners in the landscape, horticulture, veterinary and animal sectors to increase productivity, and provide training for all levels of the workforce. Enhancing competencies of the industry will support Singapore's vision of being a City in Nature.

About PUB, Singapore's National Water Agency

PUB is a statutory board under the Ministry of Sustainability and the Environment (MSE). It is the national water agency, which manages Singapore's water supply, water catchment, and used water in an integrated way. From April 2020, PUB also took on the responsibility of protecting Singapore's coastline from sea-level rise as the national coastal protection agency.

PUB has ensured a diversified and sustainable supply of water for Singapore with the *Four National Taps* (local catchment water, imported water, NEWater, desalinated water). PUB leads and coordinates whole-of-government efforts to protect Singapore from the threat of rising seas and the holistic management of inland and coastal flood risks.

PUB calls on everyone to play a part in conserving water, in keeping our waterways clean, and in caring for Singapore's precious water resources. If we all do our little bit, there will be enough water for all our needs – for commerce and industry, for living, for life.

About Sentosa Development Corporation

Sentosa Development Corporation (SDC) was established on 1 September 1972 as a Statutory Board under the Ministry of Trade and Industry. Its charter since inception has been to oversee the development, management, marketing, and promotion of the island of Sentosa as a resort destination for locals and tourists.

SDC wholly owns its subsidiaries Sentosa Cove Resort Management Pte Ltd and Sentosa Golf Club Pte Ltd. SDC also owns the Singapore Cable Car Sky Network, managed by Mount Faber Leisure Group Pte Ltd, a wholly owned subsidiary which operates as an autonomous commercial arm.

As a testament to its commitment to sustainability, SDC has been conferred the Global Sustainable Tourism Council – For Destinations (GSTC-D) certificate, making Sentosa the first island destination in Asia to receive this accolade.

About the Singapore Food Agency

The mission of the Singapore Food Agency (SFA) is to ensure and secure a supply of safe food. To safeguard Singapore's food security, SFA adopts a multi-pronged approach which includes diversifying food import sources and increasing local food production. To ensure that food in Singapore is safe for consumption, SFA has in place an integrated farm-to-fork food safety system which adopts a risk-based approach guided by science and aligned with international standards. As food safety and security is a joint responsibility, SFA provides an enabling environment that supports all stakeholders to play their part.

For more information on SFA, visit www.sfa.gov.sg

About SLA

Singapore Land Authority (SLA) is a statutory board with the Ministry of Law. Its mission is to optimise land resources for the social and economic development of Singapore. SLA manages some 11,000 hectares of State land and about 2,600 State properties, which have largely been tenanted out for a variety of uses. It also manages land sales, leases, acquisitions and allocation, developing and marketing land-related information, and maintaining the national land information database through digitised land information services. Being the national land registration authority for property transactions, SLA issues and guarantees land titles in Singapore. It also manages and maintains the national land survey system, where boundaries or legal limits of properties are defined, based on a coordinated cadastre survey system. The use of geospatial information is also spearheaded by SLA through a national collaborative environment where geospatial data, policies and technologies are established and defined, thereby fostering innovation, knowledge and value creation for the Government, enterprises and community.

For more details, visit www.sla.gov.sg or find us on LinkedIn, Facebook and Instagram @SingaporeLandAuthority.
